ROMAN BUTKUS

Software Engineer / Student

SUMMARY

I have started programming 4 years ago. Since then i have been mostly focused on C# and ASP.NET development. For the last year I have been participating in several hackathons, game jams and have been on a school project economics related in Denmark, where I have improved my programming and economics skills. I have also been working in Aalto Fablab as student assistant where I worked with hardware. Currently I`m and intern in Cybersecutiry Finland building a project with the team.
